DETAILED ACTION

Status Of Claims

1. This Office Action is in response to an amendment received 5/22/2008 in which Applicant lists claims 1-5 as being currently amended. It is interpreted by the examiner that claims 1-5 are pending.

Information Disclosure Statement

2. The information disclosure statement filed 6/20/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the lined through references have not been considered. It is noted that no reference appears to have been attached to the response received 5/22/2008.

Drawings

3. The replacement drawings and amendments to the specification were received on 5/22/2008. These drawings and amendments are accepted. The objections to the drawings cited in the office action mailed 3/17/2008 are hereby withdrawn.

Specification

4. The amendments to the specification dated 5/22/2008 are accepted. The objections to the specification cited in the office action mailed 3/17/2008 are hereby withdrawn.

Claim Objections

5. The amendments to the claims dated 5/22/2008 are accepted. The objections to the claims cited in the office action mailed 3/17/2008 are hereby withdrawn.

Response to Arguments

6. Applicant's arguments, see pages 9-11, filed 5/22/2008, with respect to the rejection of claim 2 have been fully considered and are persuasive. The rejection of claim 2 has been withdrawn.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Toshikatsu Imaizumi (61,648) on 8/27/2008.

The application has been amended as follows:

- a) on line 2 of claim 3, "laser light source are expanded" has been changed to --laser light source is expanded--;
- b) on line 3 of claim 3, "a laser beam" has been changed to --the laser beam--;
- c) on line 3 of claim 4, "the rotary polarizer" has been changed to --a rotary polarizer--;
- d) on line 4 of claim 4, "parallel beams" has been changed to --parallel beam,--;
- e) on line 5 of claim 4, "said polarizer and said mirror unit are collected" has been changed to --a polarizer and a mirror unit, is collected--;
- f) on line 5 of claim 5, "laser beams" has been changed to --laser beam--.

Allowable Subject Matter

- 8. Claims 1-5 are allowed.
- 9. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest rotary annulus light in which a laser beam is introduced into an objective lens of a microscope at a peripheral region, wherein the direction of illumination of the laser beam is rotatable and illumination is performed using s-polarized light that is perpendicular to a radial direction from the center of optical axis of the objective lens at all times, as generally set forth in claim 1, the device including, in combination with the remaining features recited in claim 1.

Claims 2, 4 and 5 depend from claim 1 and are therefore allowable for at least the same reasons as claim 1.

Claim 3 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest rotary annulus light in which a laser beam from a laser light source is expanded by a beam expander provided with a spatial filter such that the laser beam diameter is increased to up to one half the average diameter of the annulus, and thereafter which the expanded beam is introduced into a rotary polarizer and mirror unit, effectively eliminating the need for the use of an annulus-diaphragm, as generally set forth in claim 3, the device including, in combination with the remaining features recited in claim 3. Claims 4 and 5 depend from claim 3 and are therefore allowable for at least the same reasons as claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
